ABSTRACT

These school statistics are compiled from estimated data provided by the 50 state education agencies and the District of Columbia for use by the National Education Association's state and local affiliates, which employ them in their negotiations, research, and lobbying activities. Current-year projections of enrollment, staff, and financial variables enable educators to assess the demand for public school services. Eleven state-by-state tables permit interstate and regional comparisons of educational systems; trends in national-level data are identified in the text. Estimates are featured for the 1983-84 school year and for 1982-83 by state, with summary statistics for the United States from 1973 to 1984. Data on current-year projects, state-by-state tables, and trends are divided into five main categories: (1) general administration (basic administrative units); (2) pupils (fall enrollment in schools, average daily membership (ADM), average daily attendance (ADA), and high school graduates); (3) instructional staff (total instructional staff, classroom teachers, instructional staff salaries, and classroom teachers' salaries); (4) revenue and nonrevenue receipts; and (5) expenditures (total expenditures, current expenditures, current expenditure per pupil in ADA, current expenditure per pupil in ADM, current expenditures for other programs, capital outlay, and interest on school debt). A glossary is also provided. (PB)

FOREWORD

For the past forty-two years, *Estimates of School Statistics* has presented data on public schools for the fifty states and the District of Columbia. This report is compiled from estimated data provided by state education agencies, to whom NEA Research is greatly indebted.

These estimated data are collected for use by NEA's state and local affiliates who employ them in their negotiations, research, and lobbying activities. Current-year projections of enrollment, staff, and financial variables enable educators to assess the demand for public school services. State-by-state figures in Tables 1 through 11 permit interstate and regional comparisons of educational systems, while trends in national-level data are identified in the text.

The publication also has attracted an expanding group of users outside the Association including legislators, government officials, and academics, due to its timely projections of school statistics.

Estimates are featured for the current school year (1983-84) and for the prior year (1982-83) by state, with summary statistics for the United States over the last decade. These figures represent the informed projections of state education agencies as of December 1983, and are subject to revision by the state agencies at the close of the school year as the school systems' accounts are closed and audited.

In the fall of the year, NEA Research submits estimates of over 35 educational statistics to each state's department of education for verification and revision. The figures submitted by NEA result from regression analysis, a statistical technique designed to predict data points based on a given set of criteria. Only if an education department does not comment on the predictions do they appear in their original regression-generated form. Please note these exceptions on page 26.

NEA Research also provides state education agencies with an opportunity to revise their fall figures for inclusion in *Rankings of the States*, an NEA Research report published in the summer. For this reason, estimated data contained in these two publications may differ.

This edition of *Estimates of School Statistics* features one notable change. The category "Population 5-17 Years of Age" has been discontinued due to the low response rate for that variable by the state agencies. Further, age group estimates made by the Bureau of the Census previously used by NEA Research to supplement missing state data have experienced delays in publication. Due to these data limitations, this variable will no longer be requested or featured in the report.

NEA Research extends its appreciation to the state department of education personnel for their cooperation, especially in light of the difficulty inherent in responding to the *Estimates* survey so early in the school year.

The project was directed by Susan Carmon Gewirtz with the assistance of Will Myers and Peter Veillette. Special thanks are extended to Susan Falsey for her direction of the project's computer operations.

Significant Developments in Public School Statistics

- For the sixth year in a row, the major source of revenue for public elementary and secondary schools is the state government. The states are providing 49.0 percent of school revenue in 1983-84, compared to 42.7 percent in 1973-74.

- The local government share of public school funding has been declining steadily since 1973-74, (49.0%) and is expected to decrease slightly from 44.8 percent in 1982-83 to 44.5 percent in 1983-84.

- For 1983-84, the federal government's contribution to public elementary and secondary school revenues continues to decline—down from 6.8 percent in 1982-83 to an estimated 6.4 percent in 1983-84. This is the lowest level of federal funding since the 1960's.

- The average classroom teacher salary for 1983-84 is expected to increase by 6.3 percent over the 1982-83 level (from $20,715 to $22,019).

- For 1983-84, fall enrollment in public elementary and secondary schools is estimated at 39,223,841—a decrease of 1.2 percent from the 1982-83 estimate of 39,698,833.

- The number of public school classroom teachers is expected to decline by 18,454, or 0.9 percent from 1982-83 to 1983-84. Other nonsupervisory instructional staff decreased by 0.3 percent, while the number of principals and supervisors declined by 0.3 percent.

GENERAL ADMINISTRATION

Each state has a state department of education (headed by a chief state school officer) that exercises general control over public elementary and secondary schools. Many states, particularly those with large numbers of small school districts, have intermediate administrative units operating between the state and the local levels. These intermediate units render consultative, advisory, and statistical services, and perform regulatory and inspectional functions. Some operate specialized schools for vocational education, special education, and the like. The local school district is the basic administrative unit for the operation of elementary and secondary schools or for contracting for school services. The governing body of the district is the school board. The chief administrative officer is the superintendent of schools.

Basic Administrative Units

Because of the variety of state legislative provisions for the administration and operation of public schools, marked diversity is found in school organization throughout the United States. A school district may operate a school system for all or for some of its children, (operating school district) or it may pay other school districts for these services (nonoperating school district). These basic local units range from one-school rural systems to large metropolitan systems serving many thousands.

The recorded number of basic administrative units has steadily declined from 127,531 in 1931-32 to 15,821 in 1983-84. This continuous decline primarily reflects school district consolidation and reorganization. Despite this trend, three states (California, Illinois, and Texas) still have over 1,000 districts.

The trend over the past ten years in the declining total number of basic administrative units in the states and the District of Columbia is shown in the following table:

School year	Basic administrative units
1973-74	16,790

Of the 15,821 basic administrative units estimated for 1983-84, 15,567 (98.4 percent) are operating school districts, 294 do not operate any school facility but transfer their pupils to other districts on a tuition basis. (See Table 1.) The comparison below by regional distribution of operating school districts and pupil enrollments in fall 1983 indicates the variation in sizes of school districts.

PUPILS

Enrollments, average daily membership, and average daily attendance are basic to the measurement of the size and cost of the public schools. Estimates of state fall enrollments are shown in Table 2 for 1982-83 and 1983-84. The figures for the 50 states and the District of Columbia on average daily membership, average daily attendance, and the number of high school graduates are shown in Table 3 for 1982-83 and in Table 4 for 1983-84.

Fall Enrollment in Public Schools

Average Daily Membership

Pupils are members of a school from the date they are placed on the current roll until they leave permanently. Membership is the total number of pupils belonging, the sum of those present and those absent. Average daily membership (ADM) for the school year is an average obtained by dividing the aggregate days of membership by the number of days in which schools were in session.

In *State Education Records and Reports Series: Handbook II*, the U.S. Department of Education (USDE) recommends ADM as the best measure of pupil load and for computing per pupil expenditures. However, this unit of measurement is not uniformly used throughout the country.

Column 2 of Tables 3 and 4 gives the estimated ADM for 1982-83 and for 1983-84 for the states reporting and an estimated total for the 50 states and the District of Columbia. In 1982-83 the estimated ADM total was 38,803,420; in 1983-84, 38,486,995, which represents a decrease of 0.7 percent.

The 10-year trend in ADM shows a decrease of 14.2 percent since 1973-74. The estimated ADM since 1973-74 is shown below:

School year	Average daily membership	Percent change	
		Over 1973-74	Over previous year
1973-74	44,911,989	...	...
1974-75	44,442,070	- 0.9	-0.9

1982-83	38,803,420	-13.5	-1.1
1983-84	38,486,995	-14.2	-0.7

Average Daily Attendance

The average daily attendance (ADA) for the school year is the aggregate days the pupils were actually present in school divided by the number of days school was actually in session. From 1973-74 to 1983-84, ADA decreased 5,462,225, or 13.0 percent. The figures below show the trend in ADA:

School year	Average daily attendance	Percent change	
		Over 1973-74	Over previous year
1973-74	41,854,076	...	...
1974-75	41,476,008	- 0.8	-0.8
1975-76	41,526,306	- 0.7	0.1
1976-77	40,864,515	- 2.3	-1.5
1977-78	40,160,598	- 3.9	-1.6

1982-83	36,722,567	-12.2	-0.9
1983-84	36,391,851	-13.0	-0.8

ADA was 92.5 percent of the fall enrollment in 1982-83 and is estimated at 92.8 percent in 1983-84 (Tables 3 and 4, column 4).

Column 5 of Tables 3 and 4 shows that ADA was 94.6 percent of ADM in 1982-83 and the same in 1983-84 for the 50 states and the District of Columbia. The difference between 100 percent and the percents shown in this column is an indication of average daily absence.

High School Graduates

An estimated 2,551,049 high school pupils will graduate in 1983-84. This is a 2.7 percent decrease over the estimated number of graduates in 1982-83 and 8.3 percent lower than in 1973-74. The figures below show the 10-year trend:

School year	Number of high school graduates	Percent change

For 1983-84 the total number of classroom teachers is estimated at 2,117,057, a loss of 18,454 teachers over the revised estimate of 2,135,511 for 1982-83. Since 1973-74 the total classroom teaching staff has experienced a net decrease of 0.9 percent.

The figures below show the percents of change in the number of classroom teachers since 1973-74 and the yearly changes.

Instructional Staff Salaries

The estimate of the average salary of the instructional staff in 1983-84 is $23,207 (Table 7). The revised estimate for 1982-83 is $21,808 (Table 7). The gain of $1,399 represents an increase of 6.4 percent.

These average salary figures are for the entire instructional staff—classroom teachers, principals, supervisors, and other instructional personnel. In the computation of the national average, each state average is weighted by the number of instructional staff members in the state.

The 10-year salary trend is shown below:

School year	Average annual salary	Percent change	
		Over 1973-74	Over previous year
1973-74	$11,254	. . .	. . .

1982-83	21,808	93.8	7.6
1983-84	23,207	106.2	6.4

The average annual salary of the instructional staff has steadily increased from 1973-74 to 1983-84 at an annual rate of 7.5 percent. The average salary per member of the instructional staff in 1983-84 is estimated at $23,207, an increase of 106.2 percent over the average salary of $11,254 in 1973-74.

Classroom Teachers' Salaries

For 1982-83 the estimated average salary of classroom teachers was revised to $20,715, or 95.0 percent of the average salary of the total instructional staff. The revised average annual salary of elementary school teachers in 1982-83 was $20,205; of secondary school teachers, $21,380.

For 1983-84 the average salary of classroom teachers is estimated at $22,019, or 94.9 percent of the figure for the entire instructional staff, and a gain of 6.3 percent over 1982-83. The estimated average salary of elementary school teachers is $21,452; of secondary school teachers, $22,667.

The average salaries paid classroom teachers from 1973-74 to 1983-84 are shown in the figures given below for elementary and secondary school teachers and all classroom teachers.

1983-84	104.2	104.6	104.3	6.2	6.0	6.3

In terms of the constant 1966-67 dollar, the average classroom teacher salary increased from $6,821 in 1966-67 to $7,121 in 1983-84. Insofar as the consumer price index accurately measures cost-of-living increases, the real gain in the purchasing power of average salaries has amounted to 4.2 percent in the 17 years since 1966-67.

Differences among the states in average salaries are wide. Estimated average salaries paid to classroom teachers by state in 1983-84 vary from a low of $15,895 to a high of $36,564. Salaries of classroom teachers for the 50 states and the District of Columbia are distributed as follows:

Estimated average annual salary of classroom teachers	Number of states	Estimated average annual salary of classroom teachers	Number of states
Under $16,000	1	$21,000-21,999	3
16,000-16,999	2	22,000-22,999	5
17,000-17,999	6	23,000-23,999	4

19,000-19,999	6	25,000-25,999	0
20,000-20,999	7	26,000 and over	5

In 1983-84 the salary in the state with the highest average annual salary of instructional staff is 227 percent higher than that in the state with the lowest salary. The dollar gap has grown from $8,199 in 1973-74 to $20,968 in 1983-84.

REVENUE AND NONREVENUE RECEIPTS

The total revenue and nonrevenue receipts of public schools are estimated at $130,867,008,000 for 1983-84. This is an increase of 5.7 percent over the revised estimated total receipts of $123,803,240,000 for 1982-83.

All receipts that become available during the school year are reported. Receipts used for payment of principal and interest on long-term debt, and nonrevenue receipts used largely for capital outlay expenditures are included. The figures on expenditures, however, include capital outlay but not payments on principal. Chiefly for this reason, the total receipts will generally be in excess of the total expenditures.

Revenue Receipts

This series includes revenue receipts available for expenditures for current expenses (including nonday-school programs operated by the public schools), capital outlay, and debt service for public schools. Included as revenue receipts are all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands and miscellaneous sources (interest on bank deposits, tuition, gifts, school lunch charges, etc.)

For 1983-84, revenue receipts are estimated at $127,597,582,000, an increase of 5.9 percent over the revised estimate of $120,432,748,000 for 1982-83. Estimates of federal revenues present special problems because it is difficult for some states to estimate the imputed value of surplus commodities distributed for school food programs. In addition, the flow of federal revenues to the schools is not as predictable as is funding from state and local governments.

From 1973-74 through 1983-84 school revenue receipts increased 124.4 percent at an annual rate of 8.4 percent for the decade. Below are shown the revenue receipts since 1973-74 as estimated by NEA Research:

State-by-state figures on the sources of school revenue are given in Tables 8 and 9, columns 2-4 and 6-8, for the years 1982-83 and 1983-84, respectively. These figures show an expected $48,807,000 increase in federal revenues, an expected increase of $4,224,786,000 in state revenues, and an increase of $2,871,241,000 in local revenues, for a total increase of $7.1 billion in revenue receipts for the year.

The following figures show the amounts and percents of revenue receipts from federal, state, and local sources for the years 1973-74 through 1983-84. From 1973-74 to 1977-78 the percentage of state receipts had fluctuated within a narrow percentage range, but according to NEA estimates, state receipts at 49.0 percent have for the sixth year surpassed local and intermediate sources as the largest source of funds in 1983-84.

EXPENDITURES

The total expenditures of the public schools, including current expense, capital outlay, and interest, increased from $119,093,398,000 in 1982-83 to an estimated $126,883,778,000 in 1983-84. The increase of $7.8 billion includes expected expenditures from federal appropriations, rising state appropriations, and increasing local tax revenues. Increased expenditures are estimated for all major categories of expenditure, i.e., current expenditures for elementary and secondary day schools, current expenditures for other programs (community services, community colleges, adult education, etc. when operated by local school districts), capital outlay, and interest on school debt. Repayment of principal on bonded indebtedness is not included.

Total Expenditures

The total amount to be spent during 1983-84 for current expenses, capital outlay, and interest on school debt represents a 6.5 percent increase over comparable expenditures estimated for 1982-83 and a 123.9 percent increase over 1973-74.

The total expenditures from 1973-74 to 1983-84 are reported in the following table:

Current Expenditures

Current expenditures of elementary and secondary day schools include amounts paid for general control, instructional service, operation, maintenance, fixed charges, and other school services at all levels of administration—state, intermediate, and local. Current expenditures comprise all governmental contributions to the retirement fund and expenditure for school services, including attendance, health services, transportation, the net cost of food services, and other school services. This figure does not include payments for capital outlay and interest on school debt or, except when otherwise noted, amounts spent for community colleges, summer school, community services, and services to nonpublic school students.

The estimated current expenditures increased from $108,106,190,000 in 1982-83 to $115,467,791,000 in 1983-84. The following figures show the increases in current expenditures:

School year	Amount (in thousands)	Percent change Over 1973-74	Percent change Over previous year
1973-74	$ 47,844,574	. . .	. . .

1983-84	115,467,791	141.3	6.8

Annual increases over the past ten years have averaged 9.2 percent. In the 10 years since 1973-74 current expenditures for public elementary and secondary day schools have increased 141.3 percent.

Current Expenditure per Pupil in ADA

The current expenditure per pupil in average daily attendance (ADA) for elementary and secondary day schools for 1983-84 is estimated at $3,173, an increase of $229 over the revised figure of $2,944 for 1982-83.

The following table shows the average cost per pupil in ADA for each year from 1973-74 and the percent increases in cost per pupil in ADA:

School year	Amount	Percent change Over 1973-74	Percent change Over previous year

Current expenditure per pupil in ADA increased from $1,143 in 1973-74 to an estimated $3,173 in 1983-84, a rise of 177.6 percent. Variations among the states

in expenditures per pupil are wide. Estimated expenditure per pupil in ADA for 1983-84 varies from a low of $1,962 to a high of $7,026. Expenditures per pupil in ADA in the 50 states and the District of Columbia are distributed as follows:

Current Expenditure per Pupil in ADM

Average daily membership (ADM) is recommended as a better measure than ADA for use in computing per pupil expenditure. It represents an average of the pupils belonging—those attending (ADA) plus those absent—and provides a measure of the actual number of pupils for whom the expenditures were made. Because some states have not adopted this method of pupil reporting, figures on expenditures per pupil in ADM are incomplete.

Column 4 of Tables 11 and 12 gives the expenditure per pupil in ADM for 1982-83 (revised) and for 1983-84 for each of the states and the District of Columbia reporting ADM. From this incomplete return, NEA Research has estimated that the average expenditure per pupil in ADM is $2,786 for 1982-83 and $3,000 for 1983-84.

The following figures show the average cost per pupil in ADM starting with 1973-74. The percent increases in this measure are also shown below:

School year	Amount	Percent change	
		Over 1973-74	Over previous year
1973-74	$1,065	. . .	. . .

1983-84	2,473,605	48.0	2.8

Interest payments on school debt have increased at an annual rate of 4.2 percent from 1973-74 to 1983-84.

NOTES TO ALL TABLES

TABLES 1-11

The data shown by state and by region in Tables 1 to 11 are revised estimates for 1982-83 and preliminary estimates for 1983-84. Unless otherwise noted, these estimates are consistent with the accounting procedures defined and recommended by the U.S. Department of Education. NEA Research's preliminary estimates are submitted to the cooperating agencies for verification or revision.

Tables 1-11 show totals for "50 states and D.C." This consists of a summation of the data for the 50 separate United States and the District of Columbia, for a grand total of 51 jurisdictions. The territories and the outlying areas are not included in this total.

Unverified state figures identified below are NEA Research estimates based on regression equations for each variable. These regression-based estimates are used in those cases where the state departments of education did not submit complete *Estimates* reporting forms, or did not respond to the survey at all.

Michigan: Data for intermediate school districts have been included in Tables 2-4.

New Hampshire: Fall enrollment figures include two public academies. ADM, ADA, and high school graduates categories do not include the academies, however.

South Carolina: Kindergarten pupils are counted as 0.5 FTE by the South Carolina State Department of Education for per-pupil expenditure calculations. They are counted as full-time when reporting for fall enrollment purposes. Fall pupil count is based on a 45-day ADM.

New Mexico: 1982-83 elementary classroom teacher categories include 340 men and 1150 women special education teachers that cannot be allocated between elementary and secondary classifications.

Rhode Island: Classroom teacher counts do not include special education teachers as follows: 1982-83, 1,030; 1983-84, 1,016.

TABLE 7

Hawaii: Classroom teachers are paid on the same salary scale and are in the same collective bargaining unit. Differences between elementary and secondary teacher average salaries are due to differences in longevity of service and educational credits earned beyond the bachelor's degree. Average salary figures therefore are not available for elementary or secondary teachers and have been estimated by NEA Research.

Iowa: Average salary data have been revised to eliminate inclusion of salaries of part-time employees.

Louisiana: Average classroom teacher salaries include payments under the Louisiana Professional Improvement Program.

New Mexico: Table 5 includes data for special education teachers who are characterized by having less than 6 years of experience and holding a bachelor's degree.

Oklahoma: Classroom teacher salary figures do not include the following fringe benefit amounts: 1982-83, $1,030; 1983-84, $1,050.

TABLES 8 and 9

Connecticut: State revenue receipts category includes the 30-year amortization of unfunded teacher retirement system liabilities. The capital outlay column includes redemption of principal.

Michigan: Data for intermediate school districts have been included in Tables 8 and 9.

Ohio: Total receipts column includes money for debt retirement not included in the expenditure data: 1982-83, $600,000,000; 1983-84, $600,000,000.

TABLES 10 and 11

Michigan: Data for intermediate school districts have been included in Tables 10 and 11.

New York: Total expenditures column contains the total School District General and Special Fund Expenses.

Tennessee: Federal revenue receipts do not include vocational rehabilitation aid which has been transferred to the Tennessee Human Services Department.
